## **DETAILED ACTION**

### ***Objections***

35 U.S.C. 112, first paragraph, requires the specification to be written in "full, clear, concise, and exact terms." The specification is replete with terms which are not clear, concise and exact. The specification should be revised carefully in order to comply with 35 U.S.C. 112, first paragraph. Examples of some unclear, inexact or verbose terms used in the specification are: "... alkali earth metal exists in stable or is stabled..." (page 2, lines 32-34); "...Sodium metaborate loses crystal water down to 1 or less, preferably converts into aldehyde..." (page 5, lines 17-18); "...and thereby reaction progresses totally" (page 13, lines 6-7). Also see the two contradicting sentences starting on page 5, line 34 and ending on page 6, line 6.

Lack of clarity in the specification is so confusing that the examiner cannot comprehend the chemical processes being recited and the intent of the steps. Applicants' cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Rejection 35 USC 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1621

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "stable" in claim 1 is a relative term which renders the claim indefinite. The term "stable" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. The said term is not defined in the specification, nor is there guidance for how to ascertain the stability or relative stability of the moiety to which the term pertains.

***Rejection 35 USC 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant claims: "reacting a mixture containing borate and alkali earth metal ... where the alkali metal exists in stable...". It is unclear what is meant by "exists in stable". Furthermore, specification fails to provide a clear definition or a description of the said term.

***Information Disclosure Statement***

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

***Conclusion***

Claims 1-9 are pending in the application

Claims 1-9 are rejected under 35 USC 112

Specification is objected to based on use of unclear, inexact or verbose terms.
